DIRECT VISION STANDARDS FROM ROADCREW

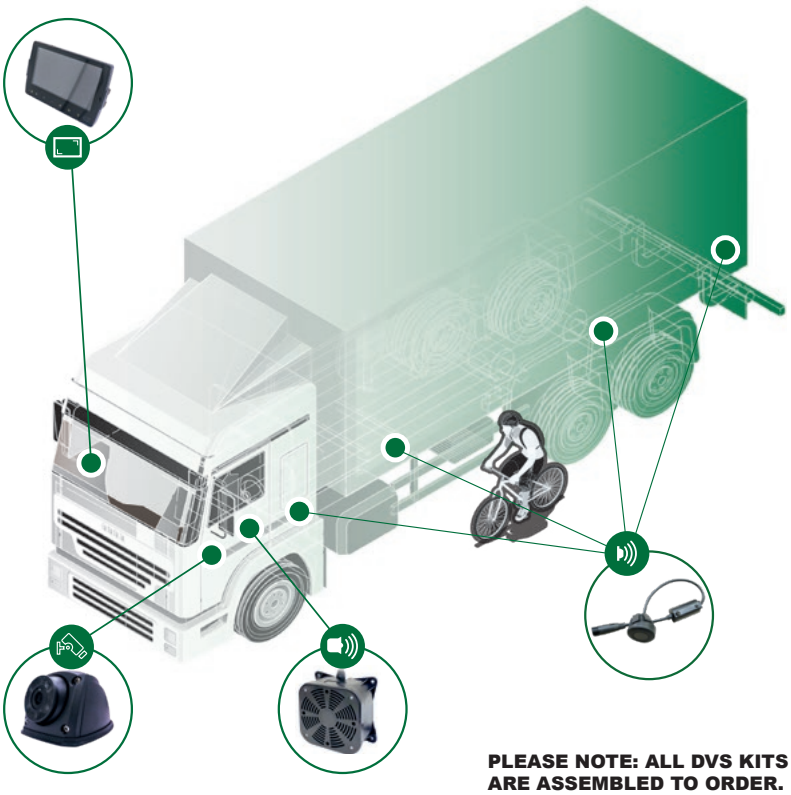
WHAT IS DIRECT VISION STANDARDS (DVS)?

DVS uses a star system to rate HGVs over 12 tonnes from 0 (lowest) to 5 (highest), based on how much a driver can see directly through their cab windows. HGVs over 12 tonnes entering or operating in Greater London will require a Safety Permit.

From 26 October 2020 all 0-star vehicles will be banned unless they have a Safe System installed to eliminate, or minimise as far as possible the front and side blind spots through the use of:

- A fully operational Camera Monitoring system fitted to the nearside of the vehicle.
- A nearside sensors system that should be in operation below 20mph.
- An audible warning to warn vulnerable road users when the vehicle is turning left.
- External pictorial warning stickers to warn of blind spots around the vehicle.

Roadcrew has a range of kits for all requirements for DVS.



PLEASE NOTE: ALL DVS KITS ARE ASSEMBLED TO ORDER.
